

DIANA Users Association

Annual report 2009

23-05-2010

Model FE Competition 25 years DIANA Users Association

dr.ir. A. de Boer
Chairman DIANA User's Association

Annual Report 2009

Contents

1. Aim of the Association
2. Executive Committee 2009
3. Activities
 - 3.1 General
 - 3.2 Technical lectures 10 November 2009
 - 3.3 DOV 25 years
 - 3.4 Int. DIANA Users Meeting 2009, 4-5 June 2009, Delft, The Netherlands
4. Financial aspects 2009
5. Publication list
6. Memberslist

1 Aim of the Association

The members of the Association are all users of the DIANA software package of TNO-DIANA BV.

In this capacity, they have a considerable interest in gaining knowledge in the Finite Element Method and (numerical) mechanics, as well as in the further development and extension of DIANA.

To achieve this, the Association fulfils a coordinating role by taking stock of the members' needs in terms of research and development, and initiating new projects.

The Association is also a meeting place for the exchange of experiences with the software package.

Furthermore, TNO-DIANA BV utilizes the Association to inform the Users on the DIANA package development progress.

2 Executive Committee 2009

During this reporting year, the Executive Committee consisted of:

Chairman: ir. A. de Boer, Centre for Public Works, Ministry of Transport, Public Works and Water Management, Utrecht

Secretary/ Treasurer: ir. N. Vollema, Royal Haskoning, Nijmegen

Committee member: dr.ir. F. Galanti, TNO Built Environment and Geosciences

The Executive Committee has mainly dealt with the following:

1. Discussion on continuing new research projects on the basis of a national and international user's wish list.
2. Organizing of the 6th International DIANA Users Meeting in Delft, the Netherlands.
3. Organising another 5-year anniversary of the Association in Delft, the Netherlands
4. Continuing contributing to the set-up a database with publications related to DIANA or FEA.
5. Extending the existing e-mail database with foreign users in the fields of concrete, concrete mechanics, bridges and tunnels.
6. Preparation of general and technical meetings.
7. Association finance.
8. Progress in an international response/discussion forum around developments now and in the future related to Users Wishes.

3 Activities

3.1 General

The Association holds a general meeting of members twice a year, followed if possible by a technical meeting (lectures). In 2009 there was held only one technical meeting, a lecture evening.

3.2 Technical lectures 10 November 2009

Capturing complex non-linear structural response through a series of linear analyses

Anne van de Graaf, Delft University of Technology

Falling anchor Kiltunnel

Henco Burggraaf, TNO Built Environment and Geosciences

The mechanical behaviour of concrete hollow-core slabs under different loads

Ab van den Bos, ABT Consultancy

Reserve capacity of beam ‘Shear8’

Chantal Frissen, TNO DIANA BV

Shear8, a benchmark ?

Joop den Uijl, Delft University of Technology

3.3 DOV 25 years

Celebration program

Start and development of the Users Association

Hans Jongedijk, formerly president DIANA Users Association till ‘97

Concrete Mechanics development over the last 25 years

Jan Rots, Delft University of Technology, The Netherlands

DIANA development in past and future

Gerd-Jan Schreppers, TNO DIANA bv, The Netherlands

Sculpture in Larvikitt

Karl Vincent Høiseth, Norwegian University of Science and Technology, Norway

Winner of the FE competition 2009

Cor van der Veen, Delft University of Technology, The Netherlands

3.4 International DIANA Users Meeting, 4-5 June 2009, Delft, the Netherlands

Lectures

Hybrid concrete beams with lightweight concrete and fibre-reinforcement

Jan Arve Øverli, Norwegian University of Science and Technology, Norway

Numerical analysis of building damage due to tunnelling: from 3D to 2D modelling

Giorgia Giardina, Delft University of Technology, The Netherlands

Settlement risk assessment for the North/Southline

Richard Roggeveld, Witteveen + Bos consulting engineers, The Netherlands

Failure behavior of a prestressed concrete box girder bridge

Chantal Frissen, TNO DIANA BV, The Netherlands

Parametric and associative modeling development as new approach for structural design in addition to finite element analysis

Eliza Guse, Delft University of Technology, The Netherlands

A model which includes compressive membrane action

Gert-Jan Bakker, Royal Haskoning, The Netherlands

Numerical simulation of the behaviour of a gusset plate connection under cyclic loading

Roberto Nascimbene, EUCENTRE, Pavia, Italy

Design of the cross-passages in the shield driven tunnels of the North/Southline

Frank Haring, Witteveen + Bos consulting engineers, The Netherlands

Analysis and design of a liquefied natural gas storage tank under spill and fire load conditions

Apostolos Tsouvalas, Royal Haskoning, The Netherlands

Concrete Floating Storage and Offloading Unit (FSO)

Karl V. Hoiseth, Norwegian University of Science and Technology, Norway

The sensitivity of Sequential Linear Analysis schemes to the number of saw-teeth in the material softening diagram

Anne van der Graaf, Delft University of Technology, The Netherlands

Modeling of severely corroded reinforced concrete beam with anchorage failure

Kamyab Zandi Hanjari, Chalmers University of Technology, Sweden

Blastanalysis on a Liquid Storage Tank

Marcel 't Hart, Royal Haskoning, The Netherlands

4. Financial aspects 2009

5. Publication list

TNO Built Environment & Geosciences, BU GeoEnergy
